

Arithmetic — Word problems

Name: _____

Date: _____

Read each problem. Write the answer.

- 1 Suki shares 28 kilograms equally among 4 boxes of apples so each one carries the same.

How many kilograms does each one hold? $28 \div 4 = 7$ kilograms

- 2 The week's order came as 2 boxes of apples, each holding 23 kilograms.

How many kilograms is that in all? ____

- 3 A full carton of milk came in at 677 milliliters, and 611 milliliters have gone by lunchtime.

How many milliliters are left? ____

- 4 Farah weighed out 5 liters and 650 milliliters of water for the recipe, which is written in milliliters.

How many milliliters is that in total? ____

Word problems — Answer key

1. $28 \div 4 = 7$ kilograms

2. $2 \times 23 = 46$ kilograms

3. $677 - 611 = 66$ milliliters

4. 5 liters = 5000 milliliters,
then $5000 + 650 = 5650$
milliliters
