

Two-step

Name: _____

Date: _____

Read each problem. Write the answer.

- 1 Priya collected 49 leaf samples and then collected 3 more. Later, Priya discarded 26 of them.

How many leaf samples does Priya have now? ____

- 2 Theo collected 35 leaf samples on Friday, 8 on Saturday, and 14 on Sunday. Theo also hiked 22 kilometres to the site.

How many leaf samples did Theo collect in all? ____

- 3 Ben collected 51 photos on Friday, 23 on Saturday, and 13 on Sunday. Ben also recorded 7 degrees on the thermometer.

How many photos did Ben collect in all? ____

Answer key

1. $49 + 3 = 52$, then $52 - 26$
= 26 leaf samples

2. $35 + 8 = 43$, then $43 + 14$
= 57 leaf samples

3. $51 + 23 = 74$, then $74 +$
 $13 = 87$ photos
